COMPANY PROFILE

Jiangsu KANGJIAN Medical Apparatus Co., Ltd. was founded in 1998. It is an enterprise specialized in manufacturing disposable medical plastic ware and laboratory apparatus. With more than 20 years' unremitting effort, the Company has come a long way and accumulated rich practical experience.

With the general concept of "Technology Creation, Health Service", KANGJIAN always treats the product quality as his vitality. Following the International standards, KANGJIAN has established a whole set of strict inner quality control system and passed ISO9001, ISO13485 and CE approval. Good quality and stability guarantees the testing data accurate and effective. Meanwhile, competitive price has made KANGJIAN's products preferred in the medical market.

Under the marketing concept of humanistic service, KANGJIAN keeps on doing the primary technology R&D, with a view to the filed of life sciences, gene organization and cell engineering, etc. In the meantime of increasing technology content, KANGJIAN also applies for many invention and new-style utility patents, which is enhancing his core competence step by step.

Advanced technical equipment and systematic training for the staff continuously improve KANGJIAN's manufacturing technique and service quality for clients. Some other cooperation ways like OEM and ODM are also well developed ever since the company began to do exportation.

Fifteen years have passed, KANGJIAN will strive to sincerely cooperate and make progress together with all the clients just as in the past, to make due contributions to human medical and health services.

Vacuum Blood Collection Tube

Product Advantage

Safety cap

Selection of high quality synthetic butyl rubber stopper, very suitable for automatic analyzer puncture sampling, its air tightness, puncture force is small, very few drops not plug the hole,and pin the needle.

Special rubber plug configuration, to reduce the wear of the puncture needle,Puncture needle life is more than twice the use of ordinary rubber stopper.

Patented design, butyl rubber stopper and safety cap with close, does not occur flip, separation phenomenon, open, coats easy and pleasant.

Suitable for all kinds of off-hat centrifuge and decapper.

Head cap colors meet internationally accepted standards.

High quality tube

The use of high-quality PET material, stable nature, and have good air tightness.

PET tube inner wall using the United States imported reagent silicification treatment, the surface is extremely smooth, to avoid cell wall.

The inner wall uses a biomimetic membrane treatment technology to provide a comprehensive and detailed protection program for blood cells.

High efficiency

Selection of Japan's SEKISUI production of coagulants and serum separation Gel, so that the blood samples more original, test results more accurate.

Use high-quality inert separation gel, no interference of the blood of physical and chemistry performance.

Get clear, transparent and clean serum specimens after fast centrifugation.

High temperature (45℃) and easy to freeze storage, with a stable nature, after centrifugation rarely appear "oil droplets" phenomenon.

Could be Gamma sterilized.

High quality additives

Use high-quality international renowned brand additive, import Swiss precision spray equipment, the medical industry leader.

The variety of additives is complete, the variety of forms, the main use of spray drying technology, so that the anticoagulant effect of uniform, mild, thorough.

Set the vacuum accurately, to ensure that the proportion of blood samples and additives accurate.

Customize the label

Depending on the customer's requirements, different materials and labels with specific identification can be customized. Prefabricated bar code easy to identify, more wearable.

Tailable label tubing and bar code label tubes are prefixed with custom labels.

Safety Cover

High Quality Tube

High Efficiency Gel

Classification of Vacuum Tubes

In the clinical experiment from the venous blood samples, the blood collection tubes divided into Serum blood tubes, plasma blood tubes and whole blood tubes according to different request of the blood specimen.

Serum blood tubes: no additive (red cap), clot activator (orange cap), Separation gel (yellow cap).

Plasma blood tubes: PT tube (blue cap), Heparin tube (green cap), Oxalate tube (grey cap), Nucleic acid detection tube (pink cap).

Whole blood tubes: Blood routine tube (purple cap), ESR tube (black cap) and Dynamic blood sedimentation tube (black cap).

KANGJIAN Medical supplies a high quality product to reduce the variation of blood samples before analysis and error for the clinic labs, We have passed ISO13485, ISO9001 and have already got the CE certificate for the blood collection tubes, We have strict procedural management for the process from purchasing of raw material to the sales of product.

Full automatic production line, After-labeling process, Image detection to keep reliable quality.

Good compatibility makes it fit different biochemical analyzer, immunity analyzer and blood analyzer.

Full range of tubes available, Ø13×75mm, Ø13×100mm, Ø16×100mm, Ø9×120mm tubes available.

In the clinic test of human venous blood samples, we divide the tubes to be serum blood tubes, Plasma blood tubes and whole blood tubes based on different test.

We can customize specialized collection volume, labels and altitude based on detailed requirements

We can supply specialized training and technique support for the distributors and final customers.

Vacuum Blood Collection Tube

1. Gel & Clot Activator Tube

Gel and clot activator tube is used for blood serum biochemistry, immunology and drug testing, etc. There uniformly sprays the coagulant on the surface inside the tube, which will greatly shorten the clotting time. As the imported separation gel from Japan is pure substance, very stable in physicochemical property, it can well stand high-temperature so that the gel will maintain a stable status during the storage and transportation process. The gel will get solidified after centrifugation and completely separate serum from fibrin cells just like a barrier, which effectively prevents the substance exchange between blood serum and cells. Serum collection efficiency is improved and high-quality serum will be obtained, thus it comes to more authentic testing result. Keep the serum stable for more than 48 hours, no obvious change will happen on its biochemical features and chemical compositions, then the tube could be directly used in sampling analyzers.

Time for complete clot retraction: 20-25min
Centrifugation speed: 3500-4000r/m
Centrifugation time: 5min
Recommended storage temperature: 4-25

2. No Additive Tube

No additive tube is used in blood collection and storage for biochemistry, immunology, serology, test of various kinds of virus and microelement in medical inspection. With special treatment on the inner surface, it's extremely smooth for normal activity of thrombocyte and unhindered clotting, which prevents hemolysis or adhesion of blood corpuscle or fibrin to the inner surface. It can provide enough pollution-free serum samples for clinical test, and maintain the normal compositions of serum for a long time. Moreover, it's helpful to serum reinspection with good repeatability.

Time for complete clot retraction: 1.5-2h
Centrifugation speed: 3500-4000r/m
Centrifugation time: 5min
Recommended storage temperature: 4-25

Vacuum Blood Collection Tube

3. Clot Activator Tube

Clot activator tube is used in the blood collection for biochemistry and immunology in medical inspection. It is suitable for wide range of operating temperature. With special treatment, the tube inner surface is very smooth where high-quality coagulant sprays uniformly. The blood sample will completely contact with coagulant and clot within 5-8min. High-quality serum thus is obtained by later centrifugation, free from the cracking of blood corpuscle, hemolysis, separation of fibrin protein, etc. Hence the serum can meet the requirements of fast clinic and emergency serum test.

Time for complete clot retraction: 20-25min
Centrifugation speed: 3500-4000r/m
Centrifugation time: 5min
Recommended storage temperature: 4-25

4. Heparin Tube

Heparin tube is used in blood collection for the test of clinical plasma, emergency biochemistry and blood rheology, etc. With little interference on blood compositions and no influence upon the erythrocyte size, it won't cause hemolysis. Besides, it has the features of quick plasma separation and wide range of operating temperature as well as high compatibility with serum index. The anticoagulant heparin activates fibrinolysin, while restraining the thromboplastin, and then achieves the dynamic balance between fibrinogen and fibrin, free of fibrin thread in the inspection process. Most of the plasma indexes can be repeated within 6 hours. Lithium heparin not only has the features of sodium heparin, but also can be used in themicroelements test with no effect on sodium ion. To meet various need of clinical laboratory, KANGJIAN can add plasma separation gel for making high-quality plasma.

Vacuum Blood Collection Tube

5. PT Tube

PT tube is used for blood coagulation test and applicable to fibrinolytic system(PT,TT, APTT and fibrinogen, etc.). The mixing ratio is 1 part citrate to 9 parts blood. Accurate ratio can guarantee effectiveness of the testing result and avoid misdiagnosis. As the sodium citrate has very little toxicity, it is also used for blood storage. Do draw sufficient blood volume to ensure accurate testing result. PT tube with double-deck is with little dead space, Which can be used to monitor the test of vWF, F₁₊₂, platelet functions, Heparin therapy.

6. Glucose Tube

Glucose tube is used in blood collection for the test such as blood sugar, sugar tolerance, erythrocyte electrophoresis, anti-alkali hemoglobin and lactate. The added Sodium Fluoride effectively prevents metabolism of blood sugar and Sodium Heparin successfully solves the hemolysis. Thus, the original status of blood will last for long time and guarantee stable testing data of blood sugar within 72 hours. Optional additive is Sodium Fluoride+Sodium Heparin, Sodium Fluoride+ EDTA.K2, Sodium Fluoride+EDTA.Na2.

Centrifugation speed: 3500-4000 r/m
Centrifugation time: 5min
Recommended storage temperature: 4-25

7. DNA Tube

Unique newly developed protective agent is non-toxic, It can fix the blood cells, restrain DNase outside the cells, Prevent the genome DNA release. Protect the dissociative DNA to be degraded. It can supply better solution for researching and applying of the dissociative Plasma DNA. It can be applied for Noninvasive screening of fetal birth defects(Noninvasive Down syndrome detection), tumour finding and research , The progress of tumour treatment and curative effect assessment. Molecular diagnostic and inspection of acute disease. Clinical Drug development and testing. The dissociative DNA can be stored at temperature of at least 14 days. Which makes sample collection, transportation and storage more convenient.

Vacuum Blood Collection Tube

8. EDTA Tube

EDTA tube is widely used in clinical haematology, cross matching, blood grouping as well as various kinds of blood cell test instruments. It offers a comprehensive protection for blood cell, especially for protecting the blood platelet, so that it can effectively stop the gathering of blood platelet and makes the form and volume of blood cell uninfluenced within a long time. Excellent outfits with super-minute technique can spray additive uniformly on the inner surface of the tube, thus blood specimen can completely mix with the additive. EDTA anticoagulant plasma is used for biological assay of pathogenic microorganism, parasite and bacterial molecule, etc.

Vacuum Blood Collection Tube

9. NAT Tube

NAT tube is widely used in collection, transportation and storage of venous blood samples and sample treatment before analysis. Mainly used for inspection of nucleic acid amplification (Incl. DNA of HBV, RNA of HCV, HIV) in clinics. The additive of this tube is: EDTA.K2+Gel separator, sterilized by Gamma radiation to ensure no DNase, RNase or Pyrogen. EDTA.K2 won't affect the activity of Taq enzyme in nucleic acid test, gel separator can eliminate the interference by hemoglobin of erythrocyte in the test of nucleic acid inspection. Samples after separation can be stored at -70℃.

10. ESR Tube

Ø13×75mm ESR Tube is specially used in blood collection and anticoagulation for Automated Erythrocyte Sedimentation Rate Analyzers sedimentation rate test with the mixing ratio of 1 part sodium citrate to 4 parts blood, by Westergren method.

Ø9×120mm ESR Tube is applicable to various Automated Erythrocyte Sedimentation Rate Analyzers. Due to little volume and negative pressure inside the tube, it needs some time for blood collection. Do patiently wait until blood stops flowing into the tube. Then completely mix the anticoagulation and additive by turning the tube upside down for 6-8 times. Inappropriate mixing will cause hemolysis, coagulation or blood bubble and influence the test result.

REF	Original REF.	Tube Specification	Nominal Volume	Additive	Tube Material	Qty/Cs

0110-0312					PET	100PCS×18

11. ESR Fast Detector

● Main Features

- Better compatibility compared with Westergren method.
- A safe, reliable and airtight operation during the whole process from blood collection to test, free of biological contamination.
- Designed with spirit level of patent technology, which ensures the detector horizontal and acclinic.
- 10 channels, synchronous operation allowed.
- Only 30 minutes needed for reading, easy and fast.
- Stainless steel soleplate with silicagel cushion on, which will avoid any noise or breakage when the ESR tube being placed.

● How to Use

- Carry out the venous blood collection according to standard requirements with 9x120mm ESR vacuum tube.
- Immediately invert the tube at 180 degrees for 6-8 times to achieve thorough mixing, which will avoid hemolysis, clotting or blood bubble.
- At the room temperature of around 20℃, vertically place the ESR tube containing blood sample onto the detector, note down the starting time and relevant numbers. Keep the detector still for 30 minutes and then read the millimeter of erythrocyte sedimentation.
- Detailed reading method: Keep it stable for 30min, align the plasma concave in ESR tubes to the zero scale of the detector. Then, read the data by aligning the upper surface of erythrocyte to the scale on the detector. (See as the schematic diagram)

● Notice

- Before operation, the ESR fast detector should be put on a steady platform and adjusted to be horizontal with knobs below the soleplate.
- The ESR tubes should be kept vertical during the whole sedimentation process, angle of inclination should not be more than 3°. Otherwise, the testing result will be of large deviation.
- Keep the room temperature at 20±5℃, sedimentation time 30±2min.

Venous Blood Collection Needle

- According to connection type, The disposable venous blood collection needle can be classified to Pen-type and Standard collection set.
- Made by Medical grade high polymer material, Sterilized by E.O, Non-toxic, aseptic and Non-Pyrogen.
- According to the gauge, needles can be divided into various specification 0.55-1.2mm, 18-25G.

KANGJIAN Blood collection set consists of rubber sleeve, rubber stopper puncture needle, luer connector, soft tube, needle hub, venipuncture needle, venipuncture needle cap and other components.

Please check the tip of the venipuncture needle before use, do not use if there are defects such as barbs, burrs, deformation, etc.

Both pen-type blood collection needles and standard Blood collection set can be used with needle holders.

Correct Method of Vacuum Blood Tube

1. Blood collection sequence and attentions

2. How to use KANGJIAN vacuum tube

Pen-type blood collection needle

Blood collection needle with scalp vein set

3. Step of correctly preparing high quality serum with Gel/Clot activator tube

Non-Vacuum Blood Collection Tube

Made of medical grade PP material.
Siliconization treatment on the inner surface, no blood adhesion after collection.
High quality gel makes the serum separation complete with no fibrin adhering to the inner surface of the tube.
There uniformly sprays the quantitative coagulant/anticoagulant, which will mix smoothly and completely with the blood, thus ensures fast coagulation or effective anticoagulation.
Good compatibility makes the tube match with various kinds of biochemical, immunity and haematology analyzers.
Labels which can indicate the precise blood collection volume can be customized according to clients requirement.

KANGJIAN now lauch the new type non-vacuum tube.
With the excellent design for the stopper and tube structure, it is convenient for inserting or removing the stopper.
Perfect match between the stopper and the tube ensures no leakage.
Easy and convenient for one-hand operation during the experiment.

Micro Blood Collection Tube

- ▲ 041 type micro blood collection tube has humanized design and snap sealed safety cap, the tube can effectively prevent blood leakage. Owing to its multi-dentation and double orientation structure, it's convenient for safe transportation and simple operation, free of blood spatter.
- ▲ The color coding of safety cap is consistent with International Standard, Easy for identification.
- ▲ Salient design for the edge of the tube mouth is easy for users shoveling blood into the tube. Simple, fast and intuitionistic, the blood volume can be easily read with clear graduation line.
- ▲ Special treatment inside the tube, it's smooth on the surface with no blood adhesion.
- ▲ KANGJIAN can customize barcode, and sterilize the tube with gamma rays as per clients' requirements

REF	Original REF.	Additive	Volume	Qty/Cs	
041-0221	KJ001	EDTA	0.25 / 0.5 / 1 ml	100PCS×30	E.O. or Gamma Radiation / Non-Sterile
041-0721		Lithium Heparin / Sodium Heparin	0.25 / 0.5 / 1 ml	100PCS×30

041-0222	KJ001-2	EDTA	0.25 / 0.5 / 1 ml	100PCS×30	V-bottom

- ▲ This type is a newly designed micro blood collection tube of 041 type. With higher automation degree in the laboratories, informatization is also promoted, barcode scanning, specimen tested on machine, Test result storage are all common items in laboratory. This newly designed micro blood collection tube can be applied for blood analyzer directly, It has advantage on function and structure which can meet the test requirement furthest.
- ▲ Smooth and round design on tube mouth, which can be used to collection tip blood sample smoothly.
- ▲ Barcode management, Enough space left to observe blood collection volume after barcode pasted. It can be connected to the informationalized data system easily.
- ▲ V bottom for easier collection and absorbing of blood sample.
- ▲ lengthened Tube body is customized for automatic inspection of blood analyzer,It can be put in test tube rack, easily for specimen management in labs.
- ▲ It can be adapted to: All manual loading analyzer, Including: Mindary 5100,5300,5800,6800. NIHON KOHDEN 7222, 8222 analyzer, SYSMEX XS500i, XS800i, 1800, 2100. It can be loaded directly in:XS1000i, 900i, XNB2, XNB4 model of SYSMEX analyzer.
- ▲ Applicable for many automatic CRP machines.

Cross-shaped incision, convenient for puncture and liquid drawing by the automatic analyzer.

Soft rubber cap with cross-shaped incision for automatic puncture and liquid drawing.

Smooth and round mouth design.

V bottom design.

Barcode information management.

REF	Original REF.	Additive	Volume	Qty/Cs	
041-0243	KJ001-1	EDTA	0.25-0.5ml	100PCS×30	E.O. or Gamma Radiation / Non-Sterile
041-0743		Lithium Heparin	0.25-0.5ml	100PCS×30	
041-0244	KJ001-1	EDTA	0.25-0.5ml	100PCS×30	E.O. or Gamma Radiation / Non-Sterile
041-0744		Lithium Heparin	0.25-0.5ml	100PCS×30	

- ▲ 042 type is designed under scientific concept, the sealed butyl rubber stopper is designed with central cross incision on top for easy inserting of the capillary. After blood collection, the cross incision automatically seal up when the capillary is pulling out, which effectively prevent blood leaking to guarantee safe and reliable transportation.
- ▲ With special surface treatment both inside the capillary and micro storage tube, blood samples will automatically flow into bottom of the storage tube through the capillary without any blood adhesion or harm to the blood corpuscle. The additive is uniformly sprayed on surface both inside the capillary and storage tube, which is quite easy for blood anticoagulation, while avoiding tiny clotting. In this way, accurate testing result is guaranteed.
- ▲ The cross incision is applicable to the sampling needle of all analyzers. Easy insert and automatic sampling requiring no cap opening operation during the whole testing process, safe and efficient.

Micro Blood Collection Tube

Funnel for Micro blood collection tube of 042 type
It's mainly used to be assorted to the KJ002 micro blood collection tube to transfer blood specimen, It's used for collection of peripheral blood capillary blood, And it allows samples to be transferred to the second tube, while using the funnel it's no need to open the rubber cover of the mico tube, And after removing the funnel the tube will be sealed again or you can send it to be analyzed by the automatic analyzer.

046-0001	KJ205-2			Customized	Funnel for Micro blood collection tube E.O. or Gamma Radiation

043 type has the unique shovel-like design of the tube, easy for peripheral blood flowing into the tube rapidly, safe and convenient. Conical end is more compatible for collecting mirco blood specimen. Silicone treated on the inner face, Minutely uniform spraying makes the blood completely contact with the imported high-quality anticoagulant, which will achieve thorough anticoagulation without any worry about the tiny coagulation, thus guarantee the accuracy and reliability of the testing result.

Safety Containers

Made by PP material, No PVC included, it can reduce the contamination of environment when disposal injury wastes by high temperature.
Made by hard material, Sealed and anti-piercing, Safe, convenient, leakage proof, easy for disposal by high temperature. Once sealed, open by mistake is impossible without damage on it.
Convenient for safe disposal of disposable venous blood collection needle, also can be used for collecting syringes, infusion sets, blades and structure needles etc.
Color to be Yellow (Red can be customized), Warning marks shown on the side of the container.

Cryogenic Storage Box for Vacuum Tubes

Overview

To meet the demand of lab safety and ISO 15189 standard, We now launch the cryogenic storage box for vacuum tubes after analyzed, It makes the work for blood specimen aftertreatment faster, easier, and safer. It` s the ideal choice for laboratory safety and quality control.

According to different sealing method, it can be divided into three types: Silicagel pad,Sticky foam pad and no pad with the tube cap on.

For different clinical department, Testing items and date, We prepared 6 different colors for each of the three kinds of box: Red, Orange, Yellow, Green, Blue and Purple.

According to the tube size, each of the three types can match with tubes of two specifications: Φ13×75mm and Φ13×100mm.

To avoid any inconvenience caused by unmoral label (like multi-layer label, turnup label or corrugated label) or non-standard bigger diameter tube, KANGJIAN also launch the storage box with special structure.

Features

- Press down the cover slightly,the box will automaticly lock and seal, one light press on the buckle can easily open it.
- Detachable design allows it to be used as a test tube rack.
- Moulded code no of 1-100, convenient for locating the samples.
- Multi-color label, Easy to write related information and put on the box.
- Hidden handle design, brief and delicate.
- Particular locating slot design makes boxes stack available without moving or sliding.
- Convenient to put or take out tubes with unnormal label (like multi-layer label, turnup label or corrugated label, or tubes with big diameter less than Φ14mm).
- Adapted to store tubes with safety cap on.

Types

- Silicagel Pad :
- Adapted to store vacuum blood collection tubes after cap removed.
 - The silicagel pad is made by superior raw material to keep its physical and chemical property stable. Flexible and no deformation, combines tight with tubes while closing the cover.
 - Ensure the flat surface of the pad outward, or else it would affect the sealing.
- Sticky Foam :
- Adapted to store vacuum blood collection tubes after cap removed.
 - Features: Easy and convenient for disposal without blood pollution.
 - Strong adhesion can tightly seal the blood collection tubes after closing the cover. Twice stickup is available after tube being removed from thepad.

Virus Collection and Preservation System	28-29
Cervix Sampler & Cervix Sampling Set	30

Transport Swab with Tube

1. Transport Swab with PS Tube (REF: 161 521)

This kind of swab is composed by stainless steel stick, tip and PS sealing tube. The swab tip material is available in superior absorbentb cotton, artificial cotton, polyester fiber. Special treatment on the stick makes the tip wrapped on the stick tightly. Adapted to sampling from the parts of urethra and so on. Individual or bulk pack available.

2. Transport Swab with PP Tube

This kind of swab is composed of collection swab, tip and PP sealing tube. According to different requirements, the swab stick has optional material like wood, PP or PS. The swab tip material is available in superior absorbent cotton, artificial cotton, polyester fiber. Used for sampling from the parts of vagina, urogenital canal, etc. Adapted to sampling from the parts of urethra and so on. Individual or bulk pack available.

Transport Swab with Medium

It can be classified to: Amies medium, Amies with Charcoal, Stuart medium, Stuart with Charcoal, Cary-blair medium and Cary-Blair with Charcoal. It can supply a best solution for the collection ,storage, transportation of the microorganism specimen, whose character and activity can be effectively protected before analysis. It is composed by collection swab and swab tube with medium. According to different requirements, the swab stick has optional material like wood, PP or PS. The swab tip material is available in superior absorbent cotton, artificial cotton, polyester fiber. Adapted to sampling from the parts of pharyngeal, nose, ear, eye, vagina, urogenital canal, skin, intestinal tract etc. Sterilized by Gamma radiation.

- 1. Amies Agar Gel Swab:**
Used for bacillus coli sampling. Can be stored for 72 hours after collection.
- 2. Stuart Agar Gel Swab:**
Used for gonococcus sampling. Can be stored for 72 hours after collection.
- 3. Cary-Blair Agar Gel Swab:**
Used for campylobacter jejuni sampling, comma bacillus, salmonella, shigella. Can be stored for 72 hours after collection.

Flocked Swab & Standard Swab

The standard swab consists of a swab stick and cotton head. The swab stick is made of wood or PS or PP. The cotton head is made of high-quality absorbent cotton, artificial cotton or polyester cotton, which can be customized according to needs. The flocked swab adopts innovative technology of nylon fiber spray implantation to maximize the sampling efficiency of the sampling swab. The nylon fibers are vertically and evenly attached to the surface of the swab head. The upright nylon fibers are like a soft brush to collect more samples. The capillary action between the nylon fibers enhances the capacity of water-based samples, and the samples are concentrated on the surface of the swab, which makes it easier to elute. Outstanding sample collection and release capabilities, capable of quickly adsorbing small amounts of samples, and high efficiency during release. The increase in the number of targeted cells helps to improve the sensitivity of rapid diagnostic tests. It is especially suitable for sample collection of various viruses, RNA/DNA, etc. The swab stick made of ABS has a breaking point design to facilitate sample handling, storage and transportation. Gamma-irradiation sterilization, individual or bulk pack for various options.

Virus Collection and Preservation System

Description :
Adapted to collection and later separation for virus of flu, Bird flu, Hand-foot and moPreservation Medium (Inactivated)uth disease, measles etc. It is also adapted to collection and tranport for Viruses, such as Chlamydia, Mycoplasma and Ureaplasma specimens. Generally collect specimen from: Oral cavity, throat, nasopharynx, anus etc. System components: Flocked swab, Virus preservation medium and Biohazard bag.

Product composition :
1. Virus Storage Tube
Tube body and cap are made by medical grade Polypropylene, No deformation after HTHP (121℃, 15min), no embrittlement under low temperature (-196℃). it can bear static extrusion and dynamicimpact. Taper bottom design makes it bear centrifugation and shaking. Leakage proof. Non-pyrogenic and DNase/RNase-free.
2. Choose different Sample storage liquid
Preservation Medium (Non-inactivated)
The tube contains 3ml-6ml of preservation medium, According to vast test of the influence to cells among Basic liquid, buffer system, protein stabilizer, freezing protective agent, amino acid, etc. We summarize a formula which is most applicable for the virus storage. It can keep a high efficiency for virus storage, and largely increase the positive rate of virus culture. Glass bead inside foreasy elution, it can make more microorganism such as virus release to the storage media.

Virus Collection and Preservation System

Upgraded preservation medium based on international standards has good bacteriostatic performance and efficient storage, which greatly improves the positive rate of virus isolation.

1. Preservation Medium

The tube contains 3ml-6ml of preservation medium, with or without Guanidine thiocyanate, this products include virus lysates and nucleic acid presrvation solutions, and mixing it with virus samples to inactivated virus and maintain the integrity of virus nucleic acids at room temperature for 7 days. The collected viral RNA samples can be widely used in gene detection, such as PCR and high-throughput sequencing.

Uniqe media fromulation to inactivates viruses and reduces laboratory infection risk.

Preserved nucleic acids of inactivated virus samples for up to 7 days at room temperature (Cold chain transportation is not necessary).

Reduce false negatives results (Avoid RAN degradation, without affecting PCR system).

Extraction-free inactivated type is also available (Preservation solution can be directly used as a template for RT-PCR).

2. Flocked swab

The flocked swab adopts innovative technology of nylon fiber spray implantation to maximize the sampling efficiency of the sampling swab. The nylon is adhered vertically and uniformly on the surface of swab tip, which can improve the efficiency of collecting and releasing cells and liquid samples. Improve analytical sensitivity, No specimen residual and can accelerate the specimen treatment. ABS sticker is easy to break off. Adapted to cervix uteri, nasopharynx, oral cavity, Forensic Acquisition System and DNA collecting etc. Individual packed.

Higher sampling rate.

Faster and complete release of samples .

Enhance the sensitivity of diagnosis.

Easy breakpoint design.

3. Biohazard bag

The sampling tube containing virus samples will be stored and transported in the biohazard bag to ensure the safety of medical examination.

How to use :

Cervix Sampler & Cervix Sampling Set

Cervix Sampler

It is composed of stick and sampling brush.

Adapted to gynecology routine inspection and cervical mucosa disease, to judge erosion degree, epithelial dysplasia , early stage cervical cancer.

The shape and length of cervix cell sampler can be adapted to the cervix dissection structure,soft and intensive, It can collect more tissue specimen and do less harm to the tissue, 100% cells can be collected to the preservation liquid.

Cervix Sampling Set

This set is composed by cervix sampler, sampling tube and cell storage liquid, It's mainly used for inspection of cast-off cells of cervix, hydrothorax and ascite inspection, urinary sediment test, needle aspiration cell inspection. Especially for the early diagnostic of women cervical cancer.

Sampling tube:

The tube and cover were made by PP material, autoclavable(121 , 15 minutes), It can withstand extrusion and strike. Taper design on the bottom to withstand shaking and centrifugation . Sample storage liquid was preset inside the tube, totally leakage proof.

Sample storage liquid:

The HPV cell storage liquid can inhibit the growing of bacteria, It can keep the integrity of nucleic acid and keep the shape of cells.

Cervix sampler:

The material of the brush for cervix sampler is Nylon, which is very soft material, The diameter is 0.05mm. it makes the brush can take enough cell samples from the cervix uteri. The sticker of the cervix sampler is made by ABS, a break-point design makes the break-off of sticker easily, No small fragment exists when breaking off the sticker.

Multi Well Plate

Made of high quality PS material by ultraprecise mould with automatic technique. Used for fungus, bacteria and other microorganism culture.
5 optional types: 6, 12, 24, 48, 96 wells. Available in transparent, white and black plate.
According to the shape of bottom, it can be classified to: Flat bottom, U-bottom and V-bottom.
Single direction lid design with coherent ring reduces contamination.
A good combination of the lid and plate, convenient for air exchange and avoid medium contamination or loss.
Flange design for the wells prevents cross contamination. Molded letters and numbers helps locating in experiment.
Can be stacked up to save the space and good for lab environment.
Good compatibility, adapted to most of the machines.
Available in E.O. or Gamma radiation sterile.

Clear coordinate makes the operation more convenient.

The unique Slant corner design ensures the lid in single direction and avoids cross contamination.

Raised well rims prevent cross contamination.

Flange design for the wells prevents cross contamination.

Convex ring on the lid inner side can prevent the medium from being evaporated or polluted.

Detachable ELISA Plate & Deepwell Plate

Detachable ELISA Plate

This microplate is designed specially for ELISA, made of medical grade PS material, which conforms to SBS regulation. The reaction well is flat bottom, transparent with high binding force (Protein binding force 300-400ng/cm2).

The whole strip is smooth and transparent without weld line on the bottom.

The detachable plate, from 96-well to 1 well can be randomly selected, greatly improving the flexibility of diagnosis and test.

All wells are fixed in the frame with same height, which prevents the instrument from seizing up.

Superior design makes it easy and convenient for use in the automatic work station.

DNase and RNase free, non-pyrogenic.

Deepwell Plate

Made of high quality PP material, High chemical stability, Can be sterilized under high temperature, Adapted to multi-channel pipette and autom-atic machine.

Square well, U-bottom design ensures minimum sample residual.

Moulded letters and numbers, convenient for locating.

Confirm to SBS regulation, can be stacked up stably.

Good sealing performance, Top of the plate is flat and uniform to keep effective sealing.

Optional Gamma radiation sterile, DNase, RNase free and Non-pyrogenic.

Cell Culture Flask & Serum Bottle

Cell Culture Flask

It’s made by high grade transparency PS Material, the thickness is uniform of the flask, the surface is smooth and without distortion.

Three types of volume available: 50ml, 250ml and 600ml, sealing cap and filter membrane cap supplied.

Vacuum plasma surface culture(TC culture) to improve the hydrophilia of surface, excellent on cell adherent culture, Flask without TC cultured can also be supplied for suspension cell.

Vent cap(filter membrane cap) with 0.22µm hydrophobic membrane, it can facilitate gas exchange and avoid transit of microorganism outside the flask.

Sterilized by Gamma radiation, DNase/ RNase free, Non-pyrogenic.

Serum Bottle

The bottle is made by PET material, cap is made by HDPE material, high transparency, Special manufacturing technique makes it can be used for preparing and storing several kinds of liquids.

Such as nutrient solution, Serum ,reagent etc.

Plastic material is more economic than glass materials, It has a strong construction, Light weight ,and totally leakage proof.

Three types of volume available: 120ml, 250ml and 500ml, sealing cap and filter membrane cap supplied.

Graduations moulded on the bottle to keep the accuracyof volume.

Can be sterilized by Gamma radiation after requirement, DNase, RNase free and non-pyrogenic.

Cell Spreader / Cell Scraper / Lifter

Cell Spreader
Made of PS material, it is an ideal tool to keep the cell or bacteria growing uniformly on the surface of the petri dish.
Available in L, T and Δ type.
Mellow and smooth on the surface to reduce the harm to cells.
End extension design of the L spreader reduces harm to the medium.
Available in E.O. or Gamma radiation sterile.

Cell Scraper & Lifter
The blade of the cell scraper is made of PTE material. The long shaft is made of ABS material. It is mainly used for cells collection. Excellent design ensures minimum harm to cells and superior structure can make it contact to almost all the container surface.
Special blade free-turning design can keep ideal angle when collecting cells.
Made of elastic material, the blade is soft to make sure the cells won't be harmed.
The cell lifter is made of superior PE material which has a good tenacity.
Angle design for the lifter blade makes the cell collection smooth without heap.
Available in E.O. or Gamma radiation sterile. Individual Package.

PCR Tube Strips

- ◆ Made of clean PP material, thin wall and uniform thickness can keep good heat transfer.
- ◆ 0.2ml strips is available in two types: Transparent and white, respectively applicable to normal PCR and real-time PCR(qPCR) reaction.
- ◆ Good sealing performance of the 8-strip while lid closed. Easy to open the cap without contamination.
- ◆ Adapted to PCR instrument with corresponding module.
- ◆ Sterilized by Gamma radiation.

This collector is composed of Urine collection cup and vacuum urine collection tube, which is made of Medical grade Plastic material, Mainly used for urine specimen collection.

Good sealing performance prevents leakage effectively, convenient for specimen storage and transportation, also can avoid the contact between medical staff and specimen.

The cap features a label that seals the cannula in order to prevent patients from contacting with collection needle.

Available with customized bar code.

Sterilized by E.O. or Gamma radiation.

How to use

Urine collection process

I

I. Open the cap anticlockwise. (Attention: Do not touch or get off the label)

II

II. Put the cap on a clean surface.(Attention: Do not touch the suction nozzle and the inner surface of the cap and container)

III

III. Collect the urine sample.Recommended volume: 60ml.

IV

IV. Turn the cap tightly on the cup clockwise and send the container to test center.

Urine collection of medical staff

V

V. Gently mix the urine specimen before transferring.

VI

VI. Partially remove the cap protection label.

VII

VII. Insert the vacuum tube into the cavity and gently press down. The needle will puncture into the tube. Keep the tube pressed until it is full.

VIII

VIII. Remove the tube after it is filled completely and restick the protection label over hole.

IX

IX. Gently shake the urine tube and finish the sampling process.

Stool Collector

This kind of patent stool collector is mainly used for collection and pre-treatment of stool routine, FOB, Microorganism and rotavirus. Scientific structure and humanized design prevents medical staff and the environment from being polluted during specimen collection and pre-treatment. Integrated sealing method makes the operation easier and safer. It is the ideal consumable used in clinical labs which will make the test result more accurate.

It is composed of preserving liquid tube(with diluents inside), snappable stick, connection part, sealing screw cap, Sampling tip and specimen diluting tube, etc.

The integrated sealing design ensures the pre-treatment done in a completely sealed container. Easy, convenient, and safe.

The multi-groove design can make the specimen collection standardized and quantified.

The sampling stick is strong for sampling without deformation.

Made of superior PE material, the preserving liquid tube has proper thickness with good elasticity.

The snappable stick in the preserving liquid tube is hollow, can be easily broken off with pressing it at a 30° angle. 2ml diluent will flow into the diluting tube smoothly.

E.O. or radiation sterile available.

REF	Original REF.						
072-12514	KJ534	Pre-set 2.5ml Normal saline	PP	Ø25×125mm	50	500	Individual Pack, No Sterile

072-17015			PP	Ø25×170mm	50	500	Individual Pack, STERILE EO or STERILE R

How to use

I. Open the sampling device, hold the preserving liquid tube side and collect the stool sample to fill the groove, Attention: Specimen and its volume should meet the request of the test.

II. Put the sampling stick into the diluting tube and screw on the sealing cap tightly to finish the sampling.

III. The test staff needs to hold the collector and press the middle part of the preserving liquid tube to break off the snappable stick. Gently squeeze the tube and make the diluent flow into the below diluting tube completely.

IV. Gently shake the sampling device in order to make the stool specimen separated from the sampling tip and mix completely with the diluents.

V. Take off the yellow sealing cap on the diluting tube and gently squeeze the preserving liquid tube. The mixed liquid will flow out from the liquid nozzle, thus to finish pre-treatment work.

Saliva Collection and Preservation system

The main material of the system is medical-grade PS plastic, which is used for saliva collection. The vacuum collection tube is made of PET polymer raw materials and is mainly used for saliva collection and preservation.

It is suitable for the collection, storage and transportation of DNA samples during genetic disease screening, genome testing and disease testing.

Non-invasive sample collection, safe and convenient operation. Meanwhile, the saliva sample has no contact with the medical staff and has no pollution, and it can be directly used for test by automatic analyzer without twice sample transfer.

Produced in class 100,000 workshop, DNase-free, RNase-free, and pyrogen-free.

Sterilization method: Gamma-irradiation.

Red prohibition mark indicates the position of the suction hole.

Rectangular saliva specimen collection port and round suction hole.

A puncture needle is built in the suction hole. Non-specialized persons are prohibited from removing the upper label to avoid hand injury.

The lower suction head is sealed with the silicone O-ring to the bottom of the suction hole to ensure that the saliva is completely sucked into the preservation tube.

REF	Original REF.							
073-00015	KJ535	-	PS	75×35×65mm	γ-irradiation	20	500	Saliva container, bulk packed in bag
	KJ535-1	10ml	PET	Ø16×100mm	γ-irradiation	100 per rack	1200	Vacuum saliva collection tube

How to use

Relax your cheeks and knead gently for 30 seconds to facilitate saliva. Gently spit saliva into spit hole to allow the saliva to flow into the collection bottom about "FULL" mark line. (the upper foam is not included).

Insert the preservation tube in the direction of the red arrow and keep it stand for several seconds. Under the negative pressure in the tube, saliva will be sucked into the tube. Pulled out the tube after suction finished.

Shake the collecting tube upside down for 10 times to mix the saliva with the preservation solution.

Saliva Collection and Preservation System

This collector can be directly used for the collection, preservation and transportation of saliva, and the cfDNA (CellFree DNA) or virus samples in it can be stabilized by the preservation solution. It can be used for molecular diagnostic testing (including but not limited to PCR or branched DNA amplification technology), virus testing or other in vitro testing of saliva samples.

- The collection process is painless and non-invasive, and can be collected at home, which is more convenient and free.
- It consists of a saliva collector (collection funnel + sample collection tube), Replacing cap, and preservation tube (Preset 2-3mL cfDNA/virus preservation medium).
- It is used to collect, preserve and transport cfDNA or virus in saliva samples at room temperature.
- When used for virus sample collection, different virus sample preservation solutions can be customized, such as VTM preservation solution (Purple red or clear pink), preservation solution containing inactivator (colorless) or normal saline.
- When it is used to collect human DNA, DNA preservation solution is preset in the preservation solution tube. cfDNA can be preserved stably for 24 months at room temperature, suitable for a variety of DNA extraction and purification kits.
- The humanized design of the collection funnel fits the human mouth structure and is easy to operate.

073-10510	Insert type	10mL, Ø16×100mm		200	

How to use

Clean the mouth with clean water before use, and gently spit 2mL of saliva into the collection funnel (the volume does not contain saliva foam).

Place the saliva collection tube to keep it upright, and unscrew the cap of the preservation tube.

Gently pour the medium from the preservation tube into the funnel.

Pull out the funnel, properly dispose the waste funnel and empty preservation tube.

Tighten the collection tube with the replacing cap.

Shake the collection tube repeatedly and mix the saliva and preservation medium completely.

SEROLOGICAL PIPETTE

Serological Pipette

Page

53-55

Serological Pipette

Serological Pipette

- The product is made of imported high quality polystyrene (GPPS) in class 100,000 clean workshop. Novel aspiration area design can fit most of the pipettors on the market. Mainly used for accurate measure or transfer for certain volume liquid and is widely employed in the field of cell culture, bacteriology, clinical research, etc..
- ◆ Available in six capacity: 1.0ml, 2.0ml, 5.0ml, 10.0ml, 25.0ml, 50.0ml. Graduations are calibrated within ±2%.
 - ◆ 1.0ml, 2.0ml, 5.0ml pipettes are shaped by streching method.
 - ◆ 5.0ml, 10.0ml, 25.0ml, 50.0ml pipettes tips are welded to the tube by supersonic wave.
 - ◆ Smooth and clean without drawing lines.
 - ◆ Different colors correspond to different specification, easy to distinguish.
 - ◆ Maximally reduce the liquid adhesion to the tube inner wall and thus improve the sampling accuracy.
 - ◆ Excellent double-side graduation design ideally meet with the demand for liquid adding or reducing.
 - ◆ Clear and simple graduation, as well as the negative one for extra volume, makes the liquid drawing and reading easier.
 - ◆ All serological pipettes are assembled with high quality filters.
 - ◆ Strict integrity test on every pipette.
 - ◆ Non-sterile or sterilized by Gamma radiation/E.O.
 - ◆ Available with non-pyrogenic and DNase/RNase-free.

Stretched tip & Welded tip

With filters, different colors correspond to different volumes

TRANSFER PIPETTE

Page

Transfer Pipette

56-60

Transfer Pipette

Made of superior FDA certified LDPE material, Non-toxic, adapted to draw, transfer or carry for small volume liquid.
Optimizing process on surface tension, easy for the liquid flowing.
High transparency, easy to observe.
Can be bend with a certain angle, which is convenient for drawing or adding liquid in irregular or micro container.
High elasticity, adapted to fast liquid transfer without leakage.
Convenient and accurate for use with good repeatability.
Heat-seal on the tip of the pipette can achieve liquid carry.
Available in bulk or individual pack.
Available in E.O. or Gamma radiation sterile.

PIPETTE TIP

	Page
Universal Pipette Tip	62-63
Pipette tip for Automatic System	64-65
Pipette Tip	66-69
Box for Tips	69-70
Pipettor & Reagent Reservoir	70

- ◉ Made of high transparency PP material, advanced technology, the tip is straight with high accuracy.
- ◉ KANGJIAN supplies multiple tips including: universal tip, filter tip, Tip with graduation, Low-adhere tip, Non-pyrogenic tip.
- ◉ Adapted to various pipettes like: Gilson, Eppendorf, Thermofisher, Finn, Dragonlab, Qiujiing etc.
- ◉ High quality tip with smooth inner wall can avoid leakage and sample residual.
- ◉ Filter tip can prevent cross contamination between pipette/specimen and specimen.
- ◉ Available in bulk pack in plastic bag or dispenser box.
- ◉ Optional sterile by E.O or Gamma radiation.

Universal Pipette Tip [Pyrogen-free]

- ◆ The tips are produced in Class 100,000 clean workshop, made from imported polypropylene material. Each batch is strictly evaluated, DNase-free, RNase-free, pyrogen-free, Without endotoxin or PCR inhibitor.
- ◆ KANGJIAN® Universal Pyrogen-free pipette tip could be adapted to various pipettes like: Gilson; Eppendorf, Thermo(Finn);Keeven; Dragonlab etc.
- ◆ The High quality pipette tip could simply the strict workflow, Hydrophobic filter avoids cross-contamination of aerosols and liquids, Low-adhere tip could be adapted to viscose liquid and liquid with less surface tension, and reduce the liquid residue on the inner wall to ensure accurate research results.

Pipette tip for Automatic System

These tips are designed for excellent liquid treatment result, Under strict quality control procedures to ensure consistency to get excellent tip straightness and reduced variation coefficient. The tips are produced in Class 100,000 clean workshop, made from imported polypropylene material. Each batch is strictly evaluated, DNase-free, RNase-free, pyrogen-free, Without endotoxin or PCR inhibitor.

Rack for Test Tube	77-78

Test Tube

KANGJIAN® test tube is made of superior PE/PP/PS material, it has a good chemical compatibility. Adapted to storage for most of polar organic solvent, weak acid, weak base.

PS/PP test tube is manufactured with excellent technique, Some products can stand centrifuge speed up to 4500 rpm without crack or leakage.

Multiple sizes and types can meet various test requirements.

Labels can be customized to meet specific test demand.

CENTRIFUGE TUBE

	Page
◎ Micro Centrifuge Tube	80-82
◎ Spin Column	82
◎ 15ml & 50ml Centrifuge Tube	83
◎ Rack for Centrifuge Tube	84

Made of High transparency PP material, adapted to micro centrifuge, widely used in molecular biology, clinical chemistry and Bio-chemistry research.

Available in various volume: 0.2ml, 0.5ml, 1.5ml, 2ml, 5ml, etc.

Chemical corrosion and low temperature resistance.

No release reagent, plasticizer and fungistat added during production, free of heavy metal.

Stable under high centrifuge speed, up to 15000 rpm. It can guarantee staff safety and environment while testing toxic samples.

Adapted to wide range of temperature from -80 °C to 121°C, no distortion.

Clear graduation on the wall for easier observation.

Frosted area on the cap and tube for convenient mark and identification.

Available in sterile by E.O or Gamma radiation.

Micro Centrifuge Tube

Spin Column

Spin column, Liquid collection tube and pressing o-ring are made by imported medical grade polypropylene,Resistant to Acid-base and organic solvents. Can be autoclavable at 121℃. Maximum RCF : 14000×g.

Silicon basis Nucleic adsorption membrance is made by imported raw material, No contamination, No inhibitor. Unique technology makes the tiny pores exhibit a uniform distribution and the apertures are fine with same size. Thus stable, efficient and specific nucleic adsorbability can be guaranteed.

Sieve plate is made by specific fiber, 0.3mm thickness, diameter 50um, which can make an extremely low absorbing rate on DNA.

Apply to extracting various kinds of Nucleic for labs and making Nucleic purification kit by biological company.

Cryogenic Tube

- KANGJIAN cryogenic tube is made of medical grade polypropylene (PP) and is endotoxin-free. They are disposable laboratory consumables dedicated to storing biological samples.
- The anti-slip lines on the cap and the tube body are easy for screw.
- Built-in O-ring to prevent liquid leakage
- The cryogenic tube can be stored in the gas phase liquid nitrogen and can withstand low temperature to -196°C.
- Multiple color options for the cap.
- According to different requirements, there are ordinary grade and PCR grade. PCR-grade is free from DNA, DNase, RNase and endotoxin. Sterilized by gamma irradiation.

Knurled design of cap and body for easy one-handed operation.

Built-in O- ring, anti-leakage.

V bottom is conducive to centralized processing of trace samples.

External Thread Cryotube

- The cryotube uses medical grade polypropylene (PP) as raw material and is a disposable laboratory consumable dedicated to storing biological samples.
 - In the gas phase liquid nitrogen (that is, in the gaseous environment above the liquid nitrogen), it can withstand low temperatures to -196°C.
 - The external screw cap can reduce the chance of sample contamination
 - The cap has a built-in silicone O- ring to prevent liquid leakage. When operating according to the standard, there is no bursting, good sealing and no leakage. The tightness can be guaranteed even at the lowest storage temperature, ensuring the safety of samples and laboratories.
 - The cap lines makes it easy to screw the cap. The cap is equipped with a embedded small color lid for easy identification (Multiple color options).
 - The cap and the tube are made of PP raw materials with the same batch and model, so the same expansion coefficient ensures sealing.
 - Bar codes and double-digit codes are used for sample digital management and easy identification, and a large white area is convenient for marking.
 - The curved bottom design is convenient for centralized liquid handling and reduces residue.
 - According to different requirements, there are ordinary grade and PCR grade. PCR-grade is free from DNA, DNase, RNase and endotoxin.
- Sterilized by gamma irradiation.

Warning: The cryotube can only be stored in the gas phase above the liquefaction surface (such as the gas phase above liquid nitrogen). It's prohibited to immerse the cryotube in the liquid nitrogen to prevent accidents caused by sudden expansion of the air pressure in the tube.

Internal Thread Cryryotube

- The cryotube uses medical grade polypropylene (PP) as raw material and is a disposable laboratory consumable dedicated to storing biological samples.
 - The internal thread cryotube is specially designed for freezing samples in gas phase liquid nitrogen, and can withstand low temperatures to -196°C.
 - The internal screw cap can reduce the chance of sample contamination.
 - The silicone O-ring in the cap enhances the sealing, ensuring the safety of the sample and the laboratory.
 - The cap lines makes it easy to screw the cap. The cap is equipped with a embedded small color lid for easy identification (Multiple color options).
 - The cap and the tube are made of PP raw materials with the same batch and model, so the same expansion coefficient ensures sealing.
 - Bar codes and double-digit codes are used for sample digital management and easy identification, and a large white area is convenient for marking.
 - The curved bottom design is convenient for centralized liquid handling and reduces residue.
 - According to different requirements, there are ordinary grade and PCR grade. PCR-grade is free from DNA, DNase, RNase and endotoxin.
- Sterilized by gamma irradiation.

QR Code Cryovials

With the rapid development on the modern biotechnology, many biobanks are launched in the university labs, hospital sample library and research/testing center. To guarantee the safe, ordered and digitized management for the biobank, with purpose of preventing mistake by manual marking on the tubes and improving efficiency, cryovials with QR code is your most ideal choice.

Made of pure polypropylene raw material in accordance with USP Class VI, produced by GMP Class 100,000 clean workshop. No burst, no leakage, good sealing when stored in ultra-hypothermia liquid nitrogen (-196℃).

Two specifications available: 0.5ml and 1.5ml. Equipped with particular cryogenic storage box, 100pcs/box.

Multi code integrated in one: QR code on the tube bottom + bar code on writing area + Number code. Each tube has its unique identifying information. Laser etched QR code and bar code, no fading, no peeling, good stability.

Clear black printed graduation, large white writing area on the tube, with multi-color optional cap colors.

Hollow design for the bottom of the cryogenic box, especially used in centralized QR code scanning on the tube bottom by the bench top QR reader. The unique bar code on the box side can carry out convenient classified-querying and centralized management.

DNA/RNA free, Non-pyrogenic, no endotoxin, no cytotoxicity. Irradiation sterilization.

Bar code on the box.

Clear and precisely printed grid on the box lid.

Hollow design for centralized scanning by the reader.

Laser etched QR code on the bottom.

Laser etched bar code and number code.

SBS Standard 2D Cryostorage Vial

KANGJIAN SBS standard 2D Cryostorage vial adopts the international standard DataMatrix 2D coding rules, and adopts the SBS standard rack that conforms to the ANSI/SLAS industry standard. It can be used in conjunction with the automatic equipment of the biological sample library and the laboratory. KANGJIAN Cryostorage vials and racks are compatible, sturdy and easy to use, safe and reliable traceability!

Used with laboratory automation equipment (such as liquid workstations, automated refrigerators, etc.), the SBS standard rack conforming to industry standards has an 8×12 Data-matrix, and the rack has QR code and barcode identification to realize rack samples Traceable.

KANGJIAN cryostorage tube is made of medical grade pure polypropylene raw materials, two-color injection molding process, withstands -196℃~121℃, safe storage under vapor phase liquid nitrogen, and can be frozen and thawed repeatedly.

The integrated sealing design for the cap and tube prevents leakage and ensures the excellent sealing. The U-shaped design at the bottom of the tube is conducive to the full use of trace samples.

The bottom laser-etched international standard DataMatrix QR code is anti-fading, anti-wear, organic solvent resistance, clear and readable. At the same time, the tube body has a triple guarantee of QR code and digital code, easy to identify, and high traceability.

It is produced in a 100,000-level clean workshop, sterilized by gamma irradiation, free from RNase, DNase, endotoxin and pyrogen.

Other Accessories	95-96

Embedding Cassette

- ◎ Made of high density acetal polymer , specially designed to hold biopsy specimen safely for treatment , embedding and storage.
- ◎ Chemical resistance, adapted to all histology solvent, no distortion.
- ◎ Biopsy type and tissue type available.
- ◎ The 45° angled cassette features a large writing surface for marking.
- ◎ Available in multi colors: White, Pink, Green, Yellow, Orange and Blue, etc.

Slide Storage Box

Made of ABS material, available in mode of 25-place, 50-place and 100-place, etc. These boxes accommodate slides with thickness less than 2mm.
Easy for cleaning and storage, corrosion-resistant, shock-resistant.
The box base is cork lined for extra protection.

Shaking Rotator

>>> DSR-10 Digital Shaking Rotator

- Features:**
- With multiple types of fixing clips, it can carry out the mixing and shaking for vessels of different shape and size.
 - Two operation methods for choice: circling and reciprocating.
 - Compact structure. With BLDCM (Brushless DC Motor), the equipment can run smoothly with little noise for long time.
 - LCD with backlight can display the current speed, time and operation mode, convenient for reading and setting.
 - Precise digital time and speed setting can easily carry out the continuous operation mode.
 - Safe operating protection function adopted.
 - Maximum load reaches 7.5KG.
 - Wide-range voltage design. Avoid the interference to the equipment by instable voltage.

Flatbed platform (Type A)

Securing bars platform (Type B)

Four clamp platform (Type C)

Optional components:

Flatbed platform, with silicon non-slip pad, adapted to softly mixing petri dish, culture flask, Test card, etc.

Securing bars platform, can clamp different kind of container by adjusting the position of bars.

Plain spring platform, used together with spring clamp.

Spring clamp model:
25ml/50ml/100ml/200ml/500ml.

Technical Data:

Operation method:	Circling and Reciprocating
Shaker diameter:	10mm
Maximum loading weight (incl. Fixing clips):	7.5kg
Equipment input power:	35W
Motor output power:	10W
Motor type:	BLDC
Speed range:	100-500rpm / 40-350rpm
Speed display:	LCD
Timer display:	LCD
Time setting range:	1-19h59min
Operation mode:	Timing/Continuous
Shaking table lock:	Yes
Dimensions (W×H×D):	420×360×100mm
Weight:	13kg
Permissible ambient temperature:	5-50°C
Permissible relative moisture:	80%
Protection class according to DIN EN 60529:	IP21
Analog output:	Yes
Voltage:	AC 100-240V
Frequency:	50/60Hz

Shaking Rotator

>>> DSR-22 Digital Orbital Shaker

Features:

DSR-22 is the upgraded version of the traditional RPR, TRUST, VDRL screening and test orbital shaker for syphilis. It can be also widely used in mixing for various kinds of flat type labwares, such as: petri dish, culture plate, etc.

Equipped with Brushless motor, it can run smoothly and quietly, thus guarantee a long service life.

LCD with backlight can display the current speed, time and operation mode, convenient for reading and setting.

Precise digital time and speed setting can easily carry out the continuous operation mode.

Safe operation protection function adopted.

Wide-range voltage design. Avoid the interference to the equipment by instable voltage.

Common type
(No transparent cover)

Technical Data:

Operation method:	Circling
Circling diameter:	22mm
Max. Loading weight:	2kg
Speed range:	40-350rpm
Timing range:	1-19h59min
Running mode:	Timing / Continuous
Input voltage(frequency):	AC100-240V (50/60Hz)
Input power:	20W
Working plate size:	Common type: 315×315mm With cover: 255×255mm
Protective class:	IP21
Permissible ambient temperature:	5-50°C
Permissible relative moisture:	80%
Dimensions:	Common type: 420×360×125mm With cover: 420×360×145mm
Net. Weight:	Common type: 7.0kg With cover: 7.8kg

>>> KJ-201BD / KJ-201BS Orbital Shaker

Features:

Designed for sieving and testing of syphilis RPR,TRUST, VDRL.

High quality DC motor, actual life > 1000h.

Tight and reasonable structure makes it run stably. Adapted to various environment.

Adjustable knob design, easy to make it stepless speed adjustment and running at any time within 15min/60min.

KJ-201BD

KJ-201BS

Technical Data:

	KJ-201BD	KJ-201BS
Operation method:	Circling	Circling
Circling diameter:	22mm	22mm

Speed range:	20-210rpm	20-230rpm
Timing range:	0-15min / 0-60min	0-15min / 0-60min
Running mode:	Timing / Continuous	Timing / Continuous
Working plate size:	315×218mm	224×152mm
Input voltage(frequency):	AC 220V±10%(50/60Hz)	AC 220V±10%(50/60Hz)
Input power:	10W	10W
Protective class:	IP21	IP21
Permissible ambient temperature:	5-50	5-50
Permissible relative moisture:	80%	80%
Dimensions:	320×320×130mm	240×165×120mm
Net. Weight:	3.2Kg	2.5Kg

Shaking Rotator

>>> KJ-201BE / KJ-201BX / KJ-201BH Orbital Shaker

Features:

Designed for sieving and testing of syphilis RPR,TRUST, VDRL, also can be used for mixing of various kinds of petri dish, elisa plates etc.

High performance DC motor, Quiet, Stable and long lifetime.

Digital time and speed set makes the control more accurate.

Fixed transparent cover type or Non-cover type available.

LED screen for time and speed display,easy for reading and operation.

Wide-range voltage design. Avoid the interference to the equipment by instable voltage.

>>> KJ-201BY Rocking Mixer

Features:

It can carry out an action of waving swing up and down of 25 degree, which can make the liquid in the container to move mild like the wave.

Driven by High performance AC Motor, Running stable, No noise, Long lifetime.

Tight and reasonable structure makes it running stable. adapted to various environment.

Specified scalar pad is adapted to mixing of multiple types of test tubes, centrifuge tubes and tubular containers.

Technical Data:

Operation method:	Swing up and down
Angle of tilt:	25°
Max. Loading weight:	2.5kg
Motor type:	AC Motor
Speed range:	15rpm
Running mode:	Continuous
Input voltage(frequency):	AC 220V±10 % (50/60Hz)
Input power:	6W
Working plate size:	252×170mm
Protective class:	IP21
Permissible ambient temperature:	5-50°C
Permissible relative moisture:	80%
Dimensions:	346×196×95mm
Net. Weight:	2.5Kg

Shaking Rotator

>>> KJ-201BYA Digital Rocking Mixer

Features:

It can carry out an action of waving swing up and down of 7 degree(Also can be customized),which can make the liquid in the container move mild like the wave.
Specified anti-slip pad together with tightening belt is adapted to multiple culture flasks and petri dishes.
Driven by High performance DC Motor, Running stable, No noise, Long lifetime.
LCD with backlight can display the current speed, time and operation mode, convenient for readingand setting.
Precise digital time and speed setting can easily carry out the continuous operation mode.
Wide-range voltage design. Avoid the interference to the equipment by instable voltage.

Technical Data:

Operation method:	Swing up and down
Angle of tilt:	9°(Customized from 7°-12°)
Max. Loading weight:	10kg
Motor type:	DC motor
Speed range:	10-80rpm
Timing range:	1-19h59min
Running mode:	Timing/Continuous
Input voltage(frequency):	AC100-240V(50/60Hz)
Input power:	40W
Working plate size:	280×320mm
Protective class:	IP21
Permissible ambient temperature:	5-50℃
Permissible relative moisture:	80%
Dimensions:	420×355×180mm
Net. Weight:	11.5Kg

>>> KJMR-VA Digital 3D Rotation Mixer

Features:

It can carry out the action of 3D circling rotation with 9° tilt angle (can be customized), especially adapted to mixing of samples with low froth, And in process of DNA extracting, staining and decoloration.
Specified anti-slip pad together with tightening belt is adapted to multiple culture flasks and petri dishes.
Driven by High performance DC Motor, Running stable, No noise, Long lifetime.
LCD with backlight can display the current speed, time and operation mode, convenient for readingand setting.
Precise digital time and speed setting can easily carry out the continuous operation mode.
Wide-range voltage design. Avoid the interference to the equipment by instable voltage.

Technical Data:

Operation method:	3D circling rotation	Input voltage(frequency):	AC100-240V(50/60Hz)
Angle of tilt:	9°(Customized from 7°-12°)	Input power:	40W
Max. Loading weight:	5Kg	Working plate size:	280×320mm
Motor type:	DC motor	Protective class:	IP21
Speed range:	10-80rpm	Permissible ambient temperature:	5-50℃
Timing range:	1-19h59min	Permissible relative moisture:	80%
Running mode:	Timing/Continuous	Dimensions:	420×355×190mm
		Net. Weight:	12Kg

>>> KJMR-V 3D Rotation Mixer

Features:

It can carry out the action of 3D circling rotation with 20° tilt angle (can be customized), especially adapted to mixing of samples with low froth.And in process of DNA extracting,staining and decoloration.
Driven by High performance AC Motor, Running stable ,No noise, Long lifetime.
Tight and reasonable structure makes it running stable. adapted to various environment.
Specified anti-slip spike-like pad is adapted to mixing of multiple types of test tubes, centrifuge tubes and tubelar container.

Shaking Rotator

Technical Data:

Operation method:	3D circling rotation	Input power:	6W
Angle of tilt:	20°	Working plate size:	240×170mm
Max. Loading weight:	1.5kg	Protective class:	IP21
Motor type:	AC motor	Permissible ambient temperature:	5-50℃
Speed range:	20rpm	Permissible relative moisture:	80%
Running mode:	Continuous	Dimensions:	200×160×160mm
Input voltage(frequency):	AC220V±10%(50/60Hz)	Net. Weight:	2.5Kg

>>> KJ-201A Microplate Shaker (Mini-Shaker)

Features:

Elastic silicon plate, easy to clean and wear-resisting. It can fit various kinds of cell culture plates.
High performance & low noise AC motor to make rapid and thorough mixing.
Adjustable knob design can ensure stepless speed adjustment, and constant run within 60min.

KJ-201A

>>> KJ-201B Microplate Shaker

Features:

Open-type plate, easy to clean on the surface, 4 pcs of cell culture plates can be mixed at one time.
High performance & low noise AC motor to make rapid and thorough mixing.
Adjustable knob design can ensure stepless speed adjustment, and constant run within 60 min.

>>> KJ-201C Microplate Shaker

Features:

Elastic silicon plate, easy to clean and wear-resisting. It can fit various kinds of cell plates. 6pcs of cell culture plates can be mixed at one time. High performance & low noise AC motor to make rapid and thorough mixing.
Adjustable knob design can ensure stepless speed adjustment, and constant run within 60 min.

Shaking Rotator

>>> KJ-202 Powder Shaker

Features:

Reasonable design, the machine will be stable, No shifting and noise while running.
Different types of plates can carry out rapid mixing of powder drug and liquid based cells.
High performance AC motor, with wind cooling device to ensure long-time and safe running.

Technical Data:

Operation method:	Circling
Circling diameter:	3.4mm/4mm
Rating speed:	1000rpm/1200rpm
Running mode:	Continuous
Input voltage(frequency):	AC 220V±10% (50/60Hz)
Permissible relative moisture:	80%
Output power:	12W / 24W
Protective class:	IP21
Permissible ambient temperature:	5-50°C
Dimensions:	235×160×160mm
Net. Weight:	2.3Kg

Various plates:

Recommended bottles: Diameter: 1-3mm less than the O-ring.
Height: Double of the working plate.

Standard plate: Height 30mm. Including: Ø37 O-ring-1 well. Ø35 O-ring-2 wells. Ø28 O-ring-8 wells. Ø25 O-ring-8 wells.

12 well plates, Height 37mm, with 12 wells of Ø33 O-ring

20 well plates, Height 30mm, with 20 wells of Ø25 O-ring

20 well plates, Height 30mm, with 20 wells of Ø28 O-ring

12 well plates, Height 45mm, with 12 wells of Ø33 O-ring

12 well plates, Height 30mm, with 6 wells of Ø37 O-ring & 6 wells of Ø37 O-ring

>>> KJ-201ZT Multifunction Shaker

Features:

Reasonable design, the machine will be stable, No shifting and noise while running.
High performance, Low noise DC motor to ensure rapid and thorough Mixing.
Adjustable knob design can ensure stepless speed adjustment.
Customized plate available to meet different test requirements.

Technical Data:

Operation method:	Circling
Circling diameter:	4mm
Rating speed:	200-2800rpm
Running mode:	Continuous
Max. loading:	15 pcs 50ml centrifuge tubes or 50 pcs 3-50ml tubes
Input voltage(frequency):	AC 220V±10% (50/60Hz)
Permissible relative moisture:	80%
Output power:	10W
Protective class:	IP21
Permissible ambient temperature:	5-50°C
Dimensions:	260×200×260mm
Net. Weight:	2.2Kg

Shaking Rotator / Vortex Mixer

>>> KJMR-III Multifunction Mixer

Features:

Three mixing models, Adapted to mixing of Blood samples, Urinary samples, Injectables and plasma etc.
High performance & low noise stepping DC motor to make rapid and thorough mixing of samples.
Specified silicon clip ring, can fit various kinds of test tubes and centrifuge tubes.
Tight and reasonable structure makes it running stable. Adapted to various environment.
LCD with backlight can display the current speed, time and operation mode, convenient for reading and setting.
Precise digital time and speed setting can easily carry out the continuous operation mode.
Light touch panel design makes operation easy.

Technical Data:

Operation method:	Rotation: 360°clockwise 360°anticlockwise 360°clockwise-anticlockwise cross Shaking: Forward-backward reciprocating action with < 5°angle Vortex: Forward-backward reciprocating action with < 5°angle+360°clockwise rotation
Speed range:	5-40rpm
No.1 working plate:	1.5ml-15ml test tube or centrifuge tube 22pcs
No.2 working plate:	50ml centrifuge tube 6pcs, 1.5ml-15ml test tube or centrifuge tube 4pcs
Running mode:	Timing
Timing range:	1min-60h
Input voltage(frequency):	AC 220V±10% (50/60Hz)
Input power:	15W
Protective class:	IP31
Permissible ambient temperature:	5-50°C
Permissible relative moisture:	80%
Dimensions:	380×182×190mm
Net. Weight:	3 kg

NO.1 working plates:

adapted to Ø12/Ø13/Ø16 test tubes and 1.5ml-15ml centrifuge tubes.

NO.2 working plates:

adapted to Ø12/Ø13/Ø16 test tubes and 1.5ml-50ml centrifuge tubes.

>>> XH-E Vortex Mixer

Features:

It is suitable for the extraction of suspended particles, cell suspensions or drugs, mixing tissue samples, enzyme chain reaction and RIA detection.

7 kinds of adapters are available, suitable for 0.2ml-50ml various types of centrifuge tubes, test tubes, flasks and other containers.

High-efficiency, low-noise AC motor, adjustable speed, strong and stable.

Reasonable design, stable performance, flexible and simple operation.

Optional Accessories:

Rubber non-slip mat, suitable for test tubes or containers with a diameter less than 99mm

Silicone standard chuck, suitable for test tubes and small containers with a diameter less than 30mm

4-hole adapter, suitable for 50ml centrifuge tube

8-hole adapter, suitable for 5ml, 10ml, 15ml centrifuge tubes

24-hole adapter, suitable for 1.5ml and 2ml centrifuge tubes

37-hole adapter, suitable for 0.5ml centrifuge tube

88-hole adapter, suitable for 0.2ml centrifuge tube

Technical Data:

Operation method:	Circling
Circling diameter:	4.4mm
Rating speed:	0-2800rpm
Running mode:	Continuous/Inching
Working plate size:	According to accessories
Input voltage (frequency):	AC220V±10%(50/60Hz)
Permissible relative moisture:	80%
Output power:	60W
Protective class:	IP21
Permissible ambient temperature:	5-50°C
Dimensions:	130×160×155mm
Net. Weight:	2.5Kg

Vortex Mixer

>>> XH-S Vortex Mixer

Features:
For small amount of sample mix;
Touch operation;
Fixed speed: 3000rpm;
Small and beautiful;
DC brushless motor, stable performance.

Technical Data:

Operation method:	Circling
Circling diameter:	4.5mm
Rating speed:	3000rpm
Running mode:	Touch
Working plate size:	For small containers up to 30 mm in diameter
Input voltage(frequency):	AC100-240V (50/60Hz)
Permissible relative moisture:	80%
Output power:	5W
Protective class:	IP43
Permissible ambient temperature:	5-50°C
Dimensions:	Ø100×90mm
Net. Weight:	0.6kg

>>> XH-B Vortex Mixer

Features:
Wide application range: Can be used for mixing samples in Test tubes, Centrifuge tubes, flasks etc.
High performance & low noise AC motor to make rapid and thorough mixing.
Specified designed operation panel, Easy to clean and wear-resisting.
Shaking speed can be adjusted automatically based on the pressure degree.

>>> XH-C Vortex Mixer

Features:
Adapted to the mixing of finger tip blood sample, It can mix the sample thoroughly without damaging the blood cells, it also can fit different types of centrifuge tubes.
High performance & low noise AC motor to make rapid and thorough mixing.
Continuous and Inching model available, Easy to operate.
Reasonable design, compact structure and stable performance.

>>> XH-D Vortex Mixer

Features:
Adapted to re-suspension particles, extract drugs and vortex cell suspensions. Mixing tissue samples , And also can be used to ELISA reaction and RIA Tests.
Multiple plates available, can be used for various kinds of test tubes and small containers.
High performance & low noise AC motor to make rapid and thorough mixing.
Continuous and Inching model available, Easy to operate, Knob design makes it easy carry out stepless speed regulating.
Reasonable design, compact structure and stable performance.

XH-D Available plates:

Multi-well plates, Adapted for 1.5ml and 2ml Micro centrifuge tubes.

Silicon anti-slip plate, for test tubes or containers with bottom less than 99mm diameter.

Standard Silicon plate: For test tubes or containers with bottom less than 30mm diameter.

Standard plastic rack: For 10-50ml conical end centrifuge tubes and various kinds of test tubes.

Technical Data:	XH-B	XH-C	XH-D
Operation method:	Circling	Circling	Circling
Circling diameter:	3.6mm	3mm / 4mm	4.4mm
Rating speed:	2600rpm	2800rpm	1000-2800rpm
Running mode:	Continous	Continous, Short	Continous, Short
Working plate size:	Ø100mm	Ø55mm	—
Input voltage (frequency):	AC 220V±10%(50/60Hz)	AC 220V±10%(50/60Hz)	AC 220V±10%(50/60Hz)
Permissible relative moisture:	80%	80%	80%
Output power:	12W	30W	30W
Protective class:	IP21	IP21	IP21
Permissible ambient temperature:	5-50°C	5-50°C	5-50°C
Dimensions:	100×130×135mm	Ø110×150mm	180×120×180mm
Net. Weight:	2.3Kg	2.5Kg	4.5Kg

Roller Mixer

>>> KJMR-I Roller Mixer

Features:
It can carry out two functions(Roll and Swing) at same time, adapted to mixing of blood samples, adhesive materials and Liquid - solid suspensions.
Driven by High performance AC Motor, Running stable, No noise, Long lifetime.
5 rolls, comnpact structure makes it less space occupation. It can be put in cold closet or Incubators, adapted for obvious environment.
Reasonable space between the rolls makes it fit for different size tubes.

KJMR-I

>>> KJMR-II Roller Mixer

Features:
It can carry out two functions(Roll and Swing), adapted to mixing of blood samples, adhesive materials and Liquid - solid suspensions.
Driven by High performance DC declaration Motor, Running stable, No noise, Long lifetime.
7 rolls, compact structure makes it less space occupation. adapted for obvious environment.
Reasonable space between the rolls makes it fit for different size tubes.
According to actual requirements, we can supply corotation-reverse cross model, The roller can be lengthened within a certain range to fit for more tubes.

KJMR-II

>>> KJMR-IIA Roller Mixer

Features:
It can carry out two functions(Roll and Swing), adapted to mixing of blood samples, adhesive materials and Liquid - solid suspensions.
Driven by High performance DC declaration Motor, Running stable, No noise, Long lifetime.
7 rolls, compact structure makes it less space occupation. adapted for obvious environment.
LED with backlight can display the current speed, time and operation mode, convenient for readingand setting.
Precise digital time and speed setting can easily carry out the continuous operation mode.
Wide-range voltage design. Avoid the interference to the equipment by instable voltage .
Reasonable space between the rolls makes it fit for different size tubes.
According to actual requirements, we can supply corotation-reverse cross model, The roller can be lengthened within a certain range to fit for more tubes.

KJMR-IIA

Technical Data:	KJMR-I	KJMR-II	KJMR-IIA
Operation method:	Roll+swing	Roll+swing	Roll+swing
Swing angle:	±11°	22mm±1mm	22mm±1mm
Rating speed:	36rpm	20-80rpm	20-100rpm
Max. Loading weight:	0.8Kg	1.5Kg	1.5kg
Running mode:	Continous	Continous	Continous, Timing
Timing range:	—	—	0-999min
Input voltage (frequency):	AC 220V±10%(50/60Hz)	AC 220V±10%(50/60Hz)	AC100-240V(50/60Hz)
Permissible relative moisture:	80%	80%	80%
Output power:	6W	10W	10W
Roll length:	230mm	236mm	236mm
Protective class:	IP21	IP21	IP21
Permissible ambient temperature:	5-50°C	5-50°C	5-50°C
Dimensions:	260×155×140mm	410×270×100mm	410×270×100mm
Net. Weight:	3Kg	4.5Kg	4.0kg

Roller Mixer

>>> KJMR-IV Rotator Mixer

Features:
360 degree mild rotation mixing can keeps sample in suspension. Adapted to mixing of blood, urinary samples etc.
Driven by High performance DC declaration Motor, Running stable, No noise, Long lifetime.
Compact and reasonable structure makes it running stable. Adapted to various environment.
Four types elastic clip could be randomly combined for use. Adapted to 1.5ml, 15ml, 50ml centrifuge tubes and test tubes with Ø8, Ø9, Ø12, Ø13, Ø16mm diameter.

>>> KJMR-IVA Rotator Mixer

Features:
360 degree mild rotation mixing can keeps sample in suspension. Adapted to mixing of blood, urinary samples etc.
Driven by High performance DC declaration Motor, Running stable, No noise, Long lifetime.
Compact and reasonable structure makes it running stable. Adapted to various environment.
LED with backlight can display the current speed, time and operation mode, convenient for readingand setting.
Precise digital time and speed setting can easily carry out the continuous operation mode.
Wide-range voltage design. Avoid the interference to the equipment by instable voltage.
Four types elastic clip could be randomly combined. Adapted to 1.5ml, 15ml, 50ml centrifuge tubes and test tubes with Ø8, Ø9, Ø12, Ø13, Ø16mm diameter.

Technical Data:	KJMR-IV	KJMR-IVA
Operation method:	360°reverse rotation	360°reverse rotation
Tilt angle of the plate:	38°	38°
Speed range:	6-32rpm	5-35rpm
Timing range:	—	0-999min
Clip Qty:	Large size 12pcs Medium size 24pcs Small size 24pcs	Large size 12pcs Medium size 24pcs Small size 24pcs
Running mode:	Continuous	Timing/Continuous
Plate diameter:	Ø300mm	Ø300mm
Input voltage(frequency):	AC 100-240V(50/60Hz)	AC 100-240V(50/60Hz)
Input power:	10W	10W
Protective class:	IP31	IP31
Permissible ambient temperature:	5-50°C	5-50°C

Dimensions:	310×300×420mm	310×300×420mm
Net. Weight:	4.3Kg	4.0Kg

KJMR-IV / KJMR-IVA Available plates:

Large size clip, for 50ml centrifuge tubes.

Medium size clip, for to Ø16 test tubes and 10ml, 15ml centrifuge tubes.

Small size clip: for Ø13 test tube, Ø12 test tube, 1.5ml centrifuge tube.

Extra small size clip: for Ø8-9mm test tube and 0.5ml centrifuge tube.

KJMR-IV

KJMR-IVA

Roller Mixer

>>> KJMR-IVD Rotator Mixer

Features:
Electronic adjustment of speed and time.
LED display of speed and time.
Speed range from 5 to 35rpm.
Rolling action, gives gentle but effective mixing.
Adjustable mixing angle from 0 to 90°.
A wide variety of accessories are available.

Technical Data:	
Operation method:	360°reverse rotation
Tilt angle of the plate:	0-90°
Speed range:	5-35rpm
Timing range:	0-999min
Clip Qty:	Large size 8 pcs Medium size 16 pcs Small size 60 pcs
Running mode:	Timing/Continuous
Plate diameter:	Ø280mm
Input voltage(frequency):	AC 100-240V(50/60Hz)
Input power:	10W
Protective class:	IP31
Permissible ambient temperature:	5-50°C
Permissible relative moisture:	80%
Dimensions:	280×210×300mm
Net. Weight:	4.0Kg

Suitable for more tubes, such as 50ml, 15ml, 10ml centrifuge tubes, Ø16mm, Ø13mm, Ø12mm, Ø8-9mm test tubes and the others.

The mixing angle can be easy adjusted by adjusting handle.

LED with backlight can display the current speed, time and operation mode, convenient for readingand setting.

Silica gel feet, more stable fixation.

NEW

Colonometer

>>> J-2 & J-3 Colonometer

Features:

- Compact structure makes it less space occupation. Adapted for various environment.
- The LED light can be adjusted to make an ideal perspective for the operator.
- It will beeps while counting, which can avoid wrong counting.
- Unique Up-light source makes it convenient to count bacteria that is hard to observe.
- Specified designed counting pen to ensure no omit of the cells.
- Wide-range voltage design. Avoid the interference to the equipment by instable voltage.

Technical Data:	J-2	J-3
Lighting:	Matrix LED(White light)	Matrix LED(White light)
Digital display:	3 digits	3 digits / 4 digits
Counting range:	0-999	0-9999
Compatible petri dish:	50-90mm	50-150mm
Input voltage(frequency):	AC 100-240V (50/60Hz)	AC 100-240V (50/60Hz)
Input power:	20W	40W
Magnification:	3-9 Times	3-9 Times
Protective class:	IP21	IP21
Permissible relative moisture:	80%	80%
Permissible ambient temperature:	5-50°C	5-50°C
Dimensions:	255×210×160mm	360×300×180mm
Net. Weight:	2.2Kg	4.0Kg

>>> J-2S Colonometer

Features:

- J-2S is a high-tech colony counter, known for its user-friendly functions and excellent ergonomics. It can accurately count all the culture media (culture dishes, filters) used in microbiology.
- Place the petri dish on the pressure-sensitive glass surface, and you can use any felt-tip marker to press and count, and there will be a pleasant beep when counting, and the accumulated data will be displayed on the LED screen immediately. The touch sensitivity of the pressure sensor can be adjusted to adapt to different culture vessels and user habits. With the function of manually increasing or decreasing the counting button, the repeated counting or missing counting can be corrected during operation.
- The internal LED lighting system is glare-free and the luminosity is adjustable, which makes the colony form a sharp contrast view to adapt to the difficult-to-observe microorganisms in the culture container. The grid size is moderate, which is convenient for accurate counting by blocks.
- The large frameless magnifying glass (which can achieve magnification of 3 times or 9 times of observation and counting) and the unique upper light source compensation illumination make the microbial appear completely, and the counting operation to be much easier.

Technical Data:			
Lighting	White LED array	Magnification	3 times / 9 times
Digital display	3-digit LED display	Protection class	IP21
Counting range	0-999	Allowable relative humidity	80%
Counting method	Pressure sensitive	Allowable ambient temperature	5-50°C
Applicable petri dish	Ø50 Ø55 Ø60 Ø70 Ø90	Dimensions	255×210×160mm
Input voltage (Frequency)	AC 100-240V (50-60Hz)	Loupe size	Ø90mm / Ø20mm
Input power	20W	Net weight	2.8Kg

Centrifuge

>>> KJLC-I Centrifuge

Brief Introduction:

KJLC-I Centrifuge with brushless DC motor and microcomputer. It has LCD display, standard equipped rotor, time setting function and features like stepless speed change, etc. It's the ideal equipment applicable for clinic test, biochemistry, immunology, etc. which is mostly chosen by the in-stitution like medical health, food, environment, scientific research, teaching and biochemical test, etc.

Features:

- Outstanding performance:**
 - CPU precise controlling, high performance brushless DC motor, maintenance free.
 - Highly accurate speed control.
 - Timing begins after speed steady to guarantee a more precise centrifuge time.
 - Two kinds of acceleration curves, three kinds of deceleration curves, free match and combinations between acceleration and deceleration, makes the specimen separation better.
- Reliable safety:**
 - Full 304 stainless steel made rotor chamber guarantees much more safety for the rotor running.
 - Closed centrifuge chamber can much reduce biological contamination risk.
 - Aluminum material rotor ensures long service life.
 - Four important safety functions: Lid interlock, monitor for lid open / close condition, over-speed protection, automatic internal diagnosis, which can highly protect operation staff and the centrifuge.
- Humanized design:**
 - Time and speed display simultaneously, convenient for monitoring the running condition of the centrifuge.
 - Three kinds of operating mode: 10s-99min59s timing, continuous run and short run.
 - G-force (RCF) and speed (RPM) switch displayed, convenient for reading.
 - 10 groups operating parameter memory makes the working efficiency highly improved.
 - Quiet running with noise lower than 65dB.

Technical Data:

Rated speed:	300-4500rpm, increment: 10rpm / 100rpm (fast turning the SPEED dial)	Output power:	94W
Maximum RCF:	Rotor 1 : 2558-g increment: 10×g / 100×g (fast turning the SPEED dial) Rotor 2 : 2200-g increment: 10×g / 100×g (fast turning the SPEED dial)	Input power:	300W
Speed accuracy:	±20rpm	Input voltage (Frequency):	AC100-240V (50-60Hz)
Maximum capacity:	240ml	Noise level:	< 65dB
Running mode:	Timing / Continuous / Short	ACC/DEC: Acceleration :	Fast(Accelerate to Max. speed < 23S) Slow(Accelerate to Max. speed < 66S) Fast(Decelerate to stop < 23S) Slow(Decelerate to stop < 66S) Normal (according to the specimen mass)
Timing range:	10s-99min59s increment: 1S/1min(fast turning the SPEED dial)	Deceleration :	
Rotor type:	12-bore angle rotor / 24-bore angle rotor	Dimension:	450×340×230mm
Safety function:	Lid interlock, monitor for lid open / close condition, over-speed protection, automatic internal diagnosis	Net weight:	10kg
Driving motor:	Brushless DC motor		

Rotor:

Rotor NO.	Rotor Description	Tube Specifications	Tube Quantity	Tube Size (diameter×length)	Max. Speed	Max. RCF	Adapter Size (diameter×length)	Accessory (Rubber Cushion)
1	24-Bore Angle Rotor	8.5-10ml (Test tube)	24	Ø15×107 mm	4500rpm	2558 × g	Ø16×85mm	—
		4-7ml (Test tube)	24	Ø13×106 mm		2558 × g		—
		1.5-5ml (Test tube)	24	Ø13×82 mm		2264 × g		23mm
		4-7ml (Test tube)		Ø15×75 mm				
2	12-Bore Angle Rotor	8.5-10ml (Test tube)	12	Ø16×107 mm	4000rpm	1968 × g	Ø17×105mm	23mm
		4-7ml (Test tube)	12	Ø13×106 mm		1968 × g		23mm
		1.5-5ml (Test tube)	12	Ø13×82 mm		1681 × g		48mm
		15ml (Culture tube)	8	Ø17×120 mm		2200 × g		—

Centrifuge

>>> KJLC-II Mini Centrifuge

Features:

- High-performance DC motor, powerful engine, quiet when running, noise< 52dB.
- Closed-loop control technology, accurate speed control.
- Wide-voltage design to prevent interference to the running accuracy by mains fluctuation.
- Clear LED display to show time and speed.
- Speed and time adjustable for various lab experiments.
- Big volume design, max. capacity up to 8×2ml micro centrifuge tube or 16×0.2ml PCR tube.
- Rapid speed up and down. Less than 10s required to reach 10000rpm, and stop within 5s from 10000rpm.
- Easy rotor switching without any tools.
- Cover opening and closing supervision system ensures safe running.
- Five colors available for the safety cover.

Rotor:

Technical Data:

	KJLC-II	KJLC-II-S1
Rated speed	3000-10000rpm(1000rpm/grade)	6000rpm
Maximum RCF	5460×g	3280×g
Adapted tube	1) 8×0.2ml / 8×0.5ml / 8×1.5ml / 8×2ml centrifuge tube 2) 2×0.1ml PCR-8 strip tube , 2×0.2ml PCR-8 strip tube	1) 8×0.2ml / 8×0.5ml / 8×1.5ml / 8×2ml centrifuge tube 2) 2×0.1ml PCR-8 strip tube , 2×0.2ml PCR-8 strip tube
Running mode	Timing/Continuous	Continuous
Timing range	1s-99min	-
Safety performance	Cover opening/closing supervision	Cover opening/closing supervision
Motor	DC motor	DC motor
Input power	40W	20W
Output power	16W	5W
Power supply	Single-phase 100-240V (50-60Hz)	Single-phase 100-240V (50-60Hz)
Noise range	< 52 dB	< 52dB
Dimension	195(L)×170(W)×135(H)	195(L)×170(W)×135(H)
Net weight	0.8kg	0.6 kg

>>> KJLC-II-S1 Mini Centrifuge

Features:

- Ideal for microfiltration and quick spin-downs.
- Easy-to-use with dual start / stop function.
- 6000rpm fixed speed.
- Compatible with 2mLx8 and PCR8x2 rotors.
- Quiet running, noise level ≤ 52dB.
- Rotor change without tools.
- Accelerates and brakes in seconds.

Smart Labeling System

>>> KJLS-I Smart Labeling System

Features:

- KJLS-I smart labeling system is installed at blood collection windows for outpatient service and ward nursing work station. It's connected to HIS or LIS system and can get the patient information and testing items by reading the patient ID card. By one-touch operation, it can print out the barcode label with patient information and stick the label onto related blood collection tubes accurately. Intelligent labeling for specimen collection containers provides ideal software and hardware support for Standardizing specimen management and avoiding mistakes in manual operation. It's an essential tool for standardization, informatization and intelligentization in hospitals and labs.
- Desktop design, smart and reliable. The whole system can work with only one labeling machine, or with more machines together, which is applied to any blood collection department in hospitals.
- If the hospital need more than one labeling machine, all the machines can be combined together with the queuing machine to assign patients to all the blood collection windows with principle of "First come, first serve", then it can keep the blood collection process well-organized and accurate.
- Based on Windows system and its PnP design, any medical staff can get adapted to the machine easily, which will greatly improve the working efficiency.
- 8 loading channels permits 8 types of tubes, which provides the hospitals with more choice.
- One channel can hold 30 tubes. This large capacity design can reduce the trouble of frequent tube loading.
- Based on HIS/LIS system and special requirements of the hospitals, the labeling machine can choose right blood collection tubes automatically and avoid mistakes by human operation.
- Premium moisture and wear resistant label carries out more precise and clearer barcode printing. Accurate label sticking position also can be guaranteed, thus the identification rate will be greatly improved.
- Precise controlling on label sticking position can leave graduation lines or marks of the original manufacturing label uncovered, for easy observation of blood volume.

Install as simple as a printer, plug and play

Combine with queuing machine to be an intelligent system

8-channel big capacity, improve working efficiency

Simple HMI, clearly shows device status

Drawer-type main printer permits easy label changing

Secondary printer can be customized

Smart Labeling System

KJLS-I Working process:

- ① Various Input devices are available for reading patient information: Barcode scanning, ID card scanning and keyboard entering, etc.
- ② The computer obtains test items information from LIS system, and give a printing order to KJLS-I labeling system at same time.
- ③ The labeling machine chooses the right tubes and sticks label automatically.
- ④ Labels will be printed and stuck on right position, with leaving graduation lines or marks of the original manufacturing label uncovered.
Secondary printer is used for printing labels of urine/stool/sputum containers. Labels need to be peeled and stuck to containers manually.

Working process of the labeling and queuing machine management system:

Application places:

Applicable to the hospital wards of all grades, scattered clinic blood collection points, CDC, medical center, emergency center, blood bank, independent laboratory.

KJLS-I Technical parameter:

Label speed	5PCS/min
Blood collection tubes channel volume	30PCS×8 channel
Interface type	RS232
Human-computer interaction	3.5 inch touch screen
Print type	line thermal printing
Print resolution	384 dpi
Label size	31×50mm
Supported bar code type	Code128, Code 39, Code25-ITF, Code bar NW-7, JAN etc.
Label format	Code, text, symbols can be rotated in the direction of 90/180/270 degrees
Other label print	all bar code labels used for specimen collection container, 31×50mm
Software operation platform	Windows operation platform
Power supply parameters	AC220V 50/60Hz, 300W
Dimension and weight	610×480×475mm, 45Kg

Information of Queuing management system:

Outer appearance	Floor-standing ticket cabinet
Imputing method	Optional card reader, or Infrared scanner
Display screen	Touch operation mode
Number output	Thermal printing label
Blood Collecting window screen	LED display, one screen/window
